PROFILE

Full-Stack Web Developer with 4+ years of experience delivering internal CRM systems, business applications, and CMS/e-commerce websites. Hands-on with PHP, MySQL, Python/FastAPI, JavaScript, React/Next.js, WordPress, WooCommerce, and Shopify, with strengths in REST API integration, SQL and reporting optimization, production support, hosting, and deployments. Recently completed Drupal certification and known for translating business requirements into reliable, maintainable solutions.

EMPLOYMENT HISTORY

Full-Stack Web Developer, OOm Pte. Ltd, Singapore

July 2024 - Present

- **Key Project - Internal CRM Development:** Maintain and enhance a PHP-based CRM while contributing to its modernization using FastAPI and Next.js.
- Develop business workflows, REST APIs, third-party integrations, and data-synchronization processes.
- Optimize complex SQL queries, operational reports, and Excel exports to improve system responsiveness and business reporting.
- Troubleshoot production issues across frontend and backend systems, support releases, and monitor post-deployment stability.
- Collaborate with Business Analysts, Project Managers, QA teams, and users; create technical documentation and conduct knowledge-transfer sessions.
- Create technical documentation, user guides, and system process documentation
- Participate in system architecture discussions and framework improvements
- Support deployment activities, release management, and post-deployment monitoring

Junior Associate - Digital Marketing, Neolytix, US

October 2023 - July 2024

- **Key Projects - WordPress, Shopify & Web Hosting:** Managed multiple client websites across hosting environments including SiteGround, Kinsta, and control panels.
- Built and customized WordPress themes, plugins, shortcodes, and third-party integrations using REST APIs, JSON, and XML.
- Handled deployments, change requests, support tickets, uptime monitoring, and troubleshooting for WordPress and Shopify sites.
- Improved site performance and security through audits, database cleanup, plugin updates, malware prevention, and documented maintenance procedures.
- Write shortcodes or build custom plugins for enhancing functionality
- Designing and building Wordpress Projects based on client requirements (website, theme, plugin)

Junior Web Developer, OOm Pte. Ltd, Philippines

October 2022 - October 2023

- **Key Projects - Landing Pages & E-commerce Sites:** Developed WordPress and WooCommerce websites using Elementor, ACF, custom post types, and Bootstrap.
- Implemented frontend and backend changes, reusable components, and client-requested enhancements.
- Migrated websites, configured hosting environments, and optimized performance after development.
- Make sure that the website is well optimized after the development.
- Resolved compromised-site issues, applied security hardening, and prepared user manuals for websites and landing pages.
- Optimize page load speeds, database cleanup and plugin updates on a monthly basis

Associate Web Developer (Internship), NeoDocto, India

January 2022 - May 2022

- **Key Project - Gutenberg WordPress Blog Production:** Created and updated SEO-aligned WordPress blog pages using the Gutenberg editor.
- Prepared featured and gallery images to support published content.
- Served as intern team lead from February to May, assigning tasks and coordinating team output.

Student Assistant, MSEUF, Philippines

July 2018 - March 2021

- **Key Service Focus - Technical Support & Campus Services:** Provided frontline assistance to students, teachers, and staff for technical and service requests.
- Troubleshoot internet access, printers, and common hardware and software issues; supported printer setup and basic device configuration.
- Assisted with student ID issuance and printing and provided support for basic internal tools.
